Did you know?

The Norwood Park Historic District has been awarded National Register status in recognition of its historic architecture, featuring Victorian homes, Colonial Revivals, and World War II-era ranches.

Norwood Park’s Noble-Seymour-Crippen house is the oldest house in all of Chicago, which now serves as a multipurpose community center.

Norwood Park was established in 1874 as an independent village and became a part of Chicago in 1893 as the city grew outward.

Who lives in Norwood Park?¹

**POPULATION**

- **41,867**

**RACE/ETHNICITY**

- 82% Non-Hispanic White
- 6% Mexican
- 3% Puerto Rican
- 8% Non-Hispanic Black
- 1% Other

**MEDIAN AGE**

- Norwood Park: 45
- Chicago: 33

What shapes wellbeing?

- Physical Environment
- Social and Economic Factors
- Clinical Care
- Health Behaviors
- Health Outcomes

¹2014 American Community Survey five-year estimates.
Physical Environment

A community’s physical environment, such as open green space, housing quality, and safety, can greatly impact the health of its residents. To reduce health inequities, we must consider the role the environment plays in shaping health.

¹Chicago Metropolitan Agency for Planning Parcel-Based Land Use Inventory, 2013. Includes green space, parks, and space reserved for recreational activity.
²Chicago Metropolitan Agency for Planning Parcel-Based Land Use Inventory, 2013. Includes vacant residential, commercial, and industrial land as well as areas under construction.
³2014 American Community Survey five-year estimates.

All results on this page are for adults aged 18 years and older unless otherwise specified.
Social and Economic Factors

Social and economic factors drive health inequities. These factors are often beyond an individual’s control and impact health behaviors, access to care, and community health as a whole.

8% of adults are unemployed¹

Of those employed, weekly hours worked across all of their jobs:

- 37% <35 hours
- 19% 35 to <48 hours
- 44% 48 or more hours

<5% have ever been homeless

Among men:

- 48% report that racial or ethnic profiling by police is extremely or very common
- <5% report that force was used during their last police stop
- 25% have been arrested, booked, or charged since the age of 18

In the past year:

- 7% of households were food insecure
- <5% of households received food stamp benefits and accessed emergency food

Highest Educational Attainment²

- 35% Less than High School Diploma
- 57% High School Diploma
- 8% Bachelor’s Degree

Median Household Income²

- Norwood Park: $75,281
- Chicago: $47,831

All results on this page are for adults aged 18 years and older unless otherwise specified.
Clinical Care

Access to health care is a basic human right and a necessity for improving health outcomes. Yet, current policies have resulted in unequal access and quality of clinical care for underserved communities.

**Percent meeting cancer screening recommendations:**

- **70%** colorectal cancer
- **82%** cervical cancer
- **41%** breast cancer

**Health Insurance Coverage**

- **80%** public insurance
- **14%** private insurance
- **6%** uninsured

**Among adults:**

- **90%** have a usual place to go for health care
- **74%** report having a routine check-up in the past year

**In the past year:**

- **83%** saw a dentist
- **5%** did not get needed dental care due to cost

---

1. Among adults aged 18 to 64.
2. Percent of adults aged 50-75 who reported having a colonoscopy in the past 10 years, or a sigmoidoscopy in the past 5 years with a blood stool test in the past 3 years, or a blood stool test in the past year.
3. Percent of women aged 21-65 years who have not had a hysterectomy and who report having a pap test within the past 3 years.
4. Percent of women aged 50-74 who reported having a mammogram in the past two years.
5. Among those who saw a health care professional in the last year.

All results on this page are for adults aged 18 years and older unless otherwise specified.
Health Behaviors

Health behaviors are the actions people take that influence their health. Although these behaviors are traditionally considered the primary cause of health outcomes, they are often the result of economic and environmental factors which must be addressed at the city, state, or national level.

![Infographic]

Every day:

- **20%** report ever being emotionally or physically abused by their partner or someone important to them

- **20%** eat less than 1 serving of fruit

- **20%** eat less than 1 serving of vegetables

- **9%** drink 1 or more soda

- **13%** report excessive alcohol use in the past month

- **15%** smoke

- **21%** report no physical activity outside of work in the past month

In the past year:

- **<5%** used cocaine, crack cocaine, heroin, methamphetamine, or prescription painkillers that were not prescribed by a medical professional

- **11%** used marijuana

---

1 Per CDC, excessive drinking is binge drinking (4+ drinks for women, 5+ drinks for men during a single occasion) or heavy drinking (8+ drinks for women/week, 15+ drinks for men/week).

2 500 Cities Project (CDC, BRFSS, 2014).

All results on this page are for adults aged 18 years and older unless otherwise specified.
Community Health Outcomes

Health outcomes provide a snapshot of community health. However, to truly understand health and wellbeing, we must remember to examine health behaviors, access to clinical care, social and economic factors, and the physical environment.

About Sinai Survey 2.0

Sinai Community Health Survey 2.0 (Sinai Survey 2.0) was conducted by Sinai Urban Health Institute, a member of Sinai Health System. With over 500 questions on 50 topics, Sinai Survey 2.0 is one of the largest community-driven, face-to-face health surveys ever conducted in Chicago. A representative sample of residents from nine Chicago community areas completed interviews from March 2015 through September 2016. Results presented in this health profile are for adults aged 18 years and older. To learn more about Sinai Survey 2.0 and see information on other surveyed communities, visit www.sinaisurvey.org.

Sinai Survey 2.0 community health profiles were funded by generous donations from The Chicago Community Trust and Healthy Communities Foundation.

All results on this page are for adults aged 18 years and older unless otherwise specified.
